**PACE (PEOPLE'S ACTION FOR CLEAN ENERGY, INC.) urgently pleads with CEAB to invest in ALL cost-effective energy efficiency measures as required by state law. We sincerely believe that such actions are the healthiest and most economic solutions to the health and business climate in Connecticut.**

**We also strongly support the concept that Connecticut meet all federal ozone standards. NOx from all power plants must be lessened.**

**Lastly, our organization is deeply concerned with renewable energy. We feel that this path is the safest, sanest, and healthiest solution to our energy problems. Wind and solar power should have the highest priority. It has been our experience that these sources work, are low cost regarding fuel, and are heartily embraced by the Connecticut public.**

**Thank you,**

**Judi Friedman Chair PACE 101 Lawton Rd. Canton, CT 06019**
