

**The Connecticut Light and Power Company
Docket No. Greater Springfield Reliability Project**

**Data Request CEAB-01
Dated: 07/02/2008
Q-CEAB-003
Page 1 of 1**

**Witness: CL&P Panel
Request from: Connecticut Energy Advisory Board**

Question:

Page IV-4 of the MCF states that the identification of the best solution for the GSRP is based upon a study titled "New England East-West Solutions Draft Report 2, April 2008" (referred to as the "Options Analysis"). Does CL&P have any other studies, reports or analysis that identifies and evaluates solutions? If so, please provide.

Response:

Yes. Bulk attachment 1 contains ISO-NE's final "New England East-West Solutions Report 2, Options Analysis", dated June 2008. Bulk attachment 2 contains a report by The Connecticut Light and Power Company and the Western Massachusetts Electric Company entitled "Solution Report for the Springfield Area, the Greater Springfield Reliability Project Including the Springfield 115-kV Upgrades", (Springfield Solution Report), redacted public version dated July 2008. Electronic file copies of these two bulk attachments are included on a CD that is provided with the response to Data Request CEAB-01, Q-CEAB-002.
