

**The Connecticut Light and Power Company
Docket No. Greater Springfield Reliability Project**

**Data Request CEAB-01
Dated: 07/02/2008
Q-CEAB-008
Page 1 of 1**

**Witness: CL&P Panel
Request from: Connecticut Energy Advisory Board**

Question:

Did CL&P analyze only annual peak loads, or were off-peak or light load conditions analyzed? If light load conditions were analyzed, please describe that analysis in detail.

Response:

The ISO-NE Needs Report and Options Reports both analyzed peak load conditions. These transmission planning study reports were completed by ISO-NE for all of the NEEWS projects, including the National Grid components. The public versions of the ISO-NE reports were included in the municipal consultation materials which CL&P provided to the CEAB on June 16, 2008 and June 24, 2008.
